- *Adjustable Counting Position*

ACCURACY, THE KEY TO STRAPPED BANKNOTE VERIFICATION.

GNH-700 & GND-700 Series are the Next Generation Vacuum type Banknote Counters with the following new features, which ensure maximum accuracy in verification of strapped banknotes.

Variable Counting Speed

Selectable counting speeds of 1000/1500/2000/2400 pcs/min. At the highest speed selection, they provide a 60% productivity increase over conventional models (1500 pcs/min.). At the lowest speed selection, they are 33% slower than conventional models, making them ideally suitable for counting poor quality banknotes.

Easily Adjustable Counting Positions

A new Adjustment Knob locates the best counting position, and minimizes mis-counting of banknotes with pinholes or folded-corners.

Adjustment Knob

Dust-Proof and Anti-Noise Shutter

Models GNH-700 and GND-700 are equipped with dust-proof and anti-noise shutters, which open and close automatically on the Start and Stop of each counting operation.

Simple and Viewable Operation Panel

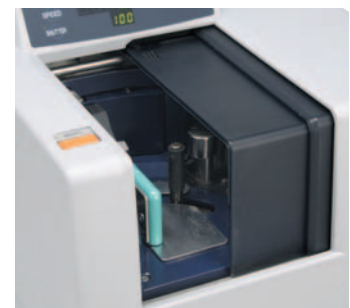

LED display on the compactly designed operation panel, ensures clear and easy viewing, indicating counted number with 4 digits, and batch numbers with 3 digits simultaneously.
